

My Family

Sensory Bag

You will need:

Ziplock clear bag

Duct tape

Sticky tape

Clear hair gel

Scissors

Small photographs of family members

Picture Frame Cut-Out

Laminator

Method

1. Laminate the photographs of family members and cut out the Picture Frame Cut-Out.
2. Squeeze some hair gel into the bag, leaving enough room so that you will later be able to squish the photographs around, when added.
3. Add the laminated photographs.
4. Once all the materials are in the bag, remove as much air from the bag as possible. Close the bag, then tape the top shut so the gel does not seep out.
5. Stick the Picture Frame Cut-Out to the front of the bag using sticky tape.
6. Let your children have fun exploring the sensory bag. Can the children move the photographs around inside the frame?
